

## Audit Tool for Coding

### Preparation

1. Prior to reviewing a group of cases with similar diagnoses and procedures, review related coding conventions and guidelines.
2. Identify possible coding problems that can occur.

### Record/Claim Review (Document findings below)

	<u>Yes</u>	<u>No</u>
1. Does the medical record:	_____	_____
a. match the claim being reviewed (patient name/admission date);		
b. contain an inpatient admission order for the date of admission and the level of care billed; and	_____	_____
c. match the provider number billed, e.g., PPS versus non-PPS?	_____	_____
2. Is medical record documentation present to substantiate the principal diagnosis as:		
a. present on admission;	_____	_____
b. a principal reason for admission; and	_____	_____
c. treated or evaluated during the stay?	_____	_____
3. Is medical record documentation present to support secondary diagnoses and complications/comorbidities billed?	_____	_____
4. Are there any secondary diagnoses or complications/comorbidities that are supported by medical record documentation and affect the DRG but were not billed?	_____	_____
5. Is medical record documentation present to support procedures billed?	_____	_____
6. Are there any procedures that are supported by medical record documentation and affect the DRG but were not billed?	_____	_____
7. Is medical record documentation present to support the patient's age and discharge status?	_____	_____
8. Are there any other coding errors?	_____	_____
If Yes, note the problem area below:		
<input type="checkbox"/> code does not match diagnosis/procedure		
<input type="checkbox"/> code lacks specificity		
<input type="checkbox"/> sequencing is incorrect		
<input type="checkbox"/> coding does not follow ICD-9-CM coding conventions		
<input type="checkbox"/> coding does not follow <i>Coding Clinic</i> guidelines		

**Findings**

Billed Diagnostic Code	Supported by Medical Record (x if yes)	Not Supported by Medical Record (x if no)	Coded Correctly <u>Yes / No</u>	If Not Supported, Note Problems
Principal			/	
Secondary			/	
			/	
			/	
			/	
			/	
			/	
			/	
			/	
			/	
			/	
Billed Procedure Codes			/	
			/	
			/	
			/	
			/	
			/	
Billed Discharge Status			/	

**DRG:** \_\_\_\_\_

**Review of Possible Problems/Regrouping Codes**

1. When necessary, refer to the physician for clarification.
2. Code and regroup to determine if changes affect the DRG.  
 Note discharge date \_\_\_\_\_, age \_\_\_\_\_ gender \_\_\_\_\_

Revised Diagnosis Codes	Narrative
Principal	
Secondary	
Revised Procedure Codes	
Discharge Status	

**DRG:** \_\_\_\_\_

3. Does coding affect the DRG?  
 Yes       No
4. Identify the cause of any DRG change
- principal diagnosis not present at admission
  - principal diagnosis not treated/evaluated during stay
  - principal diagnosis not principal reason for hospitalization
  - secondary diagnosis or complication/comorbidity billed by not substantiated
  - secondary diagnosis or complication/comorbidity substantiated in record but not billed and it changes the DRG
  - procedure omitted from claim
  - procedure billed but not substantiated in record
  - procedure determined to be medically unnecessary and must be removed from the DRG
  - disposition status is incorrect and it changes the DRG
  - patient's age is incorrect and it changes the DRG
  - correct diagnosis or procedure is incorrectly coded
  - other: \_\_\_\_\_

5. If a DRG change occurred, note the following:

Original DRG: \_\_\_\_\_  
Reimbursement: \_\_\_\_\_

Revised DRG: \_\_\_\_\_  
Reimbursement: \_\_\_\_\_
